DETAILED ACTION

Page 2

Drawings

1. The drawings are objected to because the "Optical Line Performance Monitor Unit" in the proposed drawing corrections are not optical because the input/output to/from it is electrical. Moreover, the line directed from numeral 1120 in Figs. 14-15is pointing to the whole block or the Transmission Path Input Unit. Corrected drawing sheets in compliance with 37 CFR 1.121(d) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. The figure or figure number of an amended drawing should not be labeled as "amended." If a drawing figure is to be canceled, the appropriate figure must be removed from the replacement sheet, and where necessary, the remaining figures must be renumbered and appropriate changes made to the brief description of the several views of the drawings for consistency. Additional replacement sheets may be necessary to show the renumbering of the remaining figures. The replacement sheet(s) should be labeled "Replacement Sheet" in the page header (as per 37 CFR 1.84(c)) so as not to obstruct any portion of the drawing figures. If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

2. The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

3. Claims 16-29 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. The specification does not describe an Optical Line Performance Monitor. Moreover, what is alleged or shown to be an Optical Line Performance Monitor is not really optical.

Allowable Subject Matter

- 4. Claims 1-15 and 30-36 are allowed.
- 5. The following is a statement of reasons for the indication of allowable subject matter: The art of record taken separately or in combination fail to teach the limitations of the claims.

Response to Arguments

6. Applicant's arguments filed 8/24/04 have been fully considered but they are not persuasive for the following reasons:

With respect to the proposed drawing corrections, the examiner contends that the alleged Optical Line Performance Monitor is not really optical for the reasons indicated above.

As to applicant's argument with respect to the 35 USC 112, 1st paragraph rejection, the examiner maintains his rejection for the reasons indicated in the rejection.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kinfe-Michael Negash whose telephone number is (571)272-3027. The examiner can normally be reached on 8:30AM-6:00PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Jason Chan can be reached on (571)272-3022. The fax phone number for the organization where this application or proceeding is assigned is 703-872-9306.
